Go through the 740 different PDF's that are displayed below, for example this one. You'll then be shown the first 10 pages of this specific document, you can then scroll down and click 'show full PDF'. Then you can click download you've got a totally free car manual, forever! What topics does the Jeep Cherokee Service/Repair Manual cover? In total, that's over 603205 pages of content dedicated to your Jeep Cherokee. Here's a non exhaustive list of what's covered; Jeep Cherokee service manual for roadside repairs Jeep Cherokee owners manual covering weekly checks Jeep Cherokee workshop manual covering Lubricants, fluids and tyre pressures Jeep Cherokee service PDF's covering routine maintenance and servicing Detailed Jeep Cherokee Engine and Associated Service Systems (for Repairs and Overhaul) (PDF) Jeep Cherokee Transmission data Service Manual PDF Jeep Cherokee Brakes and suspension PDF Jeep Cherokee Wiring Diagrams Looking for a Free Jeep Cherokee Haynes / Jeep Cherokee Chilton Manuals? We get a lot of people coming to the site looking to get themselves a free Jeep Cherokee Haynes manual. There are two things you need to know, firstly it's illegal, and secondly - there are much better ways of servicing and understanding your Jeep Cherokee engine than the Haynes manual. That's essentially what we're here for - to give you an alternative to the Haynes and Chilton, online and totally for free. Jupiterimages/Comstock/Getty Images Contemporary vehicles come with more flashing lights than a cop car. Low fuel warnings, tire pressure monitors and service-required messages. The Jeep Grand Cherokee limits the service-required message to indicate the routine maintenance needs of the vehicle. The light needs to be manually reset when the indicator turns on. Most maintenance shops automatically deactivate the light when performing maintenance. The process takes about 20 seconds for you to complete in case they forget to reset the light. Turn the ignition switch to the "ON" position without starting the vehicle. Press the gas pedal to the floor slowly three times within 10 seconds. Turn the ignition off. Wait 10 seconds and start the engine. Whether you're in the market for a mid-sized SUV or want to learn more about the Jeep brand, this simple guide will help you gain a basic understanding of the Jeep Grand Cherokee. From Grand Cherokee problems to the model's history, learning more can make car shopping easier. The Grand Cherokee's HistoryAs a brand, Jeep has been known as a rugged, capable vehicle since its advent during World War II. The model in use at that time was more similar to a Wrangler than a Grand Cherokee, which didn't hit the market until 1993. From its inception, marketing for the Grand Cherokee has focused on the vehicle's suitability for driving both on and off road. It's important to note that the Grand Cherokee is a different model from the Cherokee, which was introduced in the 1980s. The Grand Cherokee has been noted for its more comfortable design as a means of making it appealing to commuters and others who might not take the car off-road or drive it in a situation that calls for four-wheel drive. Choosing a Grand Cherokee ModelJeep typically releases multiple Grand Cherokee trim levels in a model year, and there can also be significant differences between the different model years as well. If you're shopping for a Grand Cherokee, think about how you'll primarily use the car. If off-roading or towing is a major concern, you may be able to find a model that caters to that need. If you're more concerned with comfort while driving on paved roads, the Grand Cherokee line usually includes some great options for that need as well. When to Choose a Grand Cherokee Over Other Jeep ModelsThe Grand Cherokee offers a bit more luxury than most other Jeep models. It is generally designed with the same rugged off-road or inclement weather driving as the brand's other models like the Wrangler but with a more comfortable interior design that appeals to city dwellers. Why to Consider Another Brand EntirelyAlthough Jeep is a brand with devoted followers, it's not known for making reliable cars. That may not hold true for individual Grand Cherokees, especially if they're well-maintained, but if you're looking to buy a car from one of the world's most trusted car brands or to maximize your value by sticking close to conventional wisdom on dependability, Jeep probably isn't the one to choose. Factors to Consider Before Shopping for a Jeep Grand CherokeeIf you're considering the Grand Cherokee because you're interested in buying a Jeep rather than looking at other car brands, you should think about factors like comfort, cargo storage, seating and whether something like a convertible top is appealing. If you're considering the Grand Cherokee because you want to purchase a midsize SUV, you should consider models from other brands and use criteria like expert reviews, brand reliability, price, financing options, trim level features and safety features. Although Jeep has a rugged image, their cars aren't necessarily cheap, and a budget brand may offer something more in line with your financial needs while checking off other boxes that the Grand Cherokee offers. From the very beginning of the history of the famous American brand, the engineers and designers of the company tried to ensure that the technical characteristics of cars always met the needs of their owners. Thanks to this powerful, reliable and able to move in almost any conditions, SUVs of the brand receive enthusiastic reviews of car owners not only in the US, but all over the world. The history of the brand is connected with the name of the talented American engineer Arthur Herrington, who after the First World War, in partnership with the company Marmon Motors, started developing off-road cars. The result of his experiments was a car, which was called a "jeep" from the English abbreviation GP, which means general purpose, i.e. General purpose. The appearance of the first "jeeps" refers to the mid-30-ies of the last century. It was during this period that the US military department needed a new model of the car for use in the army. The American military leadership decided to hold a contest for the best car, capable of passing on any off-road. In the competition, as a result, participated 3 automakers: American Bantam Company, Ford Motors and Willys-Overland, which was founded by Gene Willys. The most successful model was introduced by American Bantam. And already on the basis of its development by the decree of the US government, its models were presented by larger enterprises - Willys Overland and Ford. In November 1940, the tests of the proposed models began. As a result, both manufacturers received an order of 1500 cars. Deliveries of new products started already in 1941. And six months later, the US armed forces decided to choose one of the manufacturers, which became the company Willys and its model MA. In 1942, the MA model was modernized and renamed MB. The car was equipped with a Willys 77 engine and a three-speed transmission. The maximum speed of the model was 105 km / h. In total, at that time, 360,000 copies were produced, the bulk of which was directed to the Red Army. Thanks to the army jeep model, Willys Overland has become famous all over the world. In the postwar period, the company was engaged in the creation of cars, which did not differ much from the jeep, created for the American army. They were considered civilians only because they had a different shade of the body, not characteristic of the military color of "khaki". The civilian jeep received the index CJ - Civilian Jeep. Officially, the Jeep trademark was registered in 1950. Just at that time, the popularity of Willys products began to gradually decline. As a result, in 1953, Willys became a member of Kaiser. Over the next 10 years, the name of the company was John Willys, and in 1963 the company became known as the Kraiser-Jeep Corporation and in 1970 was incorporated into the American Motors Corporation (AMC), which in turn continued the production of the legendary "Jeeps". As part of the concern AMC, the Jeep Corporation was formed. Since 1972, the manufacturer began to equip its cars with fully automatic transmission with a permanent all-wheel drive. One of the first models, which received such functionality, was released in 1973 Wagoneer. In 1974, debuted the sporty two-door Cherokee, and in 1976, the release of the updated CJ-7, which was equipped with a removable plastic roof, as well as an open-top pickup truck - CJ-8 Scrambler. In 1978, the limited edition Wagoneer was launched - a Limited modification with leather interior, radio and chromium mass. In 1986, the premiere of a cross-country vehicle Wrangler, which instantly becomes a hit of sales. The car offered the traditional advantages of the Jeep family - endurance and unsurpassed ability to ride off-road. In 1987, the concern AMC, and, consequently, the brand, became the property of Chrysler Corporation. In 1992, at the auto show in Detroit started a new line of mid-size SUVs Grand Cherokee, which replaced the morally outdated model Waggoner. At that time, the Grand Cherokee was the best car in its class, and its success was terrific. In 1996, the sixth generation of Wrangler was launched. The car combined a refined design, excellent patency, softness of course and, of course, safety. Thanks to these features, the car has set new standards of quality in the automotive industry. In 1998, Daimler-Benz and Chrysler announced their merger into a single company called Daimler-Chrysler, which enabled them to cover all segments of the world market. Also this year the new generation of the Grand Cherokee was introduced, which once again took the place of the leader in its segment. In 2006, the SUV Commander, created on the Grand Cherokee platform and having seven seats, appears. The car was equipped with a Quadra-Drive II transmission, which allowed the transmission of torque automatically to the front or rear axle of the car. In 2007, Russia created the company CJSC Chrysler RUS, which becomes the general supplier of brands Chrysler, Jeep and Dodge. All Jeep models that are created today, one way or another are followers of the first brand cars. Every year, the company's engineers add to their models more and more useful new features that serve to improve the comfort of the car. Especially popular in the Jeep range are the Cherokee, Grand Cherokee, Wrangler and Compass models.
